

Increased efficiency with the most flexible

FiFo shelving and storage solution

At an assembly, repair or packing station, time is easily wasted on searching for the right items, going back and forth between the warehouse and the station, and missing items caused by poor inventory. You can now improve operations and increase efficiency with the Treston FiFo Flow Rack shelving, storage and picking solution.

- ✓ Works as a mini stock nearby the production, assembly, repair or packing station
- ✓ Needed parts always easily at hand
- ✓ Oldest components available first
- ✓ Helps visually keep the inventory at a good level

MODULAR TRESTON FIFO FLOW RACK

is the easiest and most efficient solution on the market

No tools needed to easily modify for different size bins and items.

Quick and easy to assemble and adjust. Only an allen key needed to assemble. An included magnetic spirit level helps when levelling the feet with a wrench.

Easy to accessorize, wide selection of accessories. Can be turned into a workstation with an additional shelf.

Extendable with rear and side modules – with as many modules as needed.

ESD version available.
